AN ISO 9001:2008 CERTIFIED COMPANY

Dear Customer

We are happy to state that Harsh Enterprises has grown into an internationally renowned manufacturing company in the line of Home Appliances. Notable attraction of our products is our perfect quality against low-price, more over the after sales services is much appreciated by most buyers. It has passed the ISI/ISO approvals for all the products. Harsh Enterprises has great potential of development & stepping to goal of being a Famous Indian brand. In this competitive market it has a great exploiter team. Harsh Enterprises is worth getting your attention!

Thank You

WROUGHT ALUMINUM

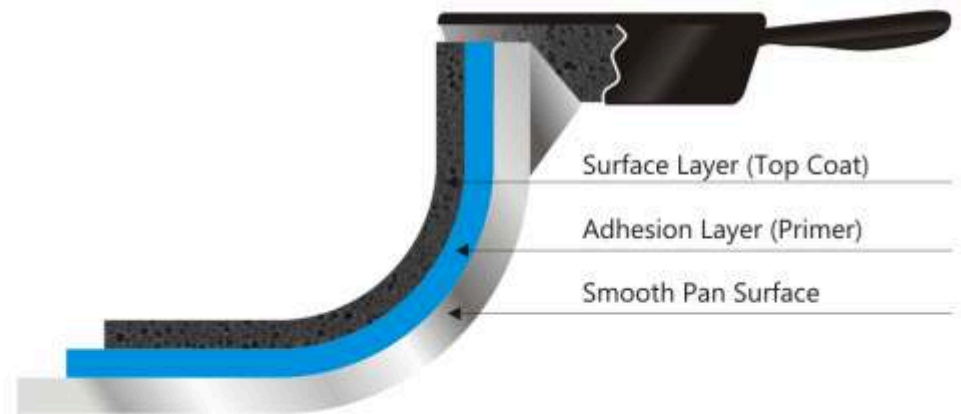

The internal coating is a fundamental component of the non-stick cookware aluminium, sensibly influencing the general performance of the product. It contributes to creating perfect cooking even with little added fats and affects the ease of washing and the duration of the cookware.

HARD ANODIZED COOKWARE

HARD ANODIZED

Hard anodized cookware is a lightweight product that is 30% harder than stainless steel. The aluminum that the cookware is made from goes through an electro-chemical interaction process that makes the aluminum harder while still maintaining its light weight. The range is perfect for daily cooking. Easy to wash and healthy to cook, the Hard Anodized Cookware is truly a new symbol of trouble free cooking.
